Próximos Pasos

Sinaí Chicago ofrece atención continua completa aquí mismo en el Hospital Holy Cross. En la clínica de **Salud de Conducta y Bajo el Arcoíris, Holy Cross** se ofrece atención ambulatoria y ambulatoria intensiva (IOP), así como atención individual para el seguimiento continuo de medicamento para una recuperación continua. Las relaciones de colaboración con centros comunitarios de salud mental, centros de tratamiento residenciales, programas de 12 pasos, vínculos con clínicas de tratamiento asistido por medicamentos (MAT) y hogares de recuperación, también son una opción para la recuperación continua de nuestros pacientes. Un consejero certificado en alcohol y drogas brindará apoyo y facilitará la planificación del cuidado posterior, proporcionando un vínculo entre el paciente y los recursos críticos necesarios para comenzar el trayecto para una recuperación exitoso.

Centro de Recuperación de Uso de Substancias

El Centro de Recuperación de Uso de Sustancias del Hospital Holy Cross es un programa hospitalario avanzado de gestión de la abstinencia de drogas y alcohol que se centra en las necesidades del individuo. El respeto por nuestros pacientes es un aspecto importante de nuestro programa de gestión de la abstinencia. El Centro de Recuperación de Uso de Sustancias brinda atención médica y gestión en un entorno hospitalario. Los profesionales médicos, incluidas enfermeras registradas, médicos de medicina interna y psiquiatras, controlarán los incómodos síntomas de la abstinencia las 24 horas del día, utilizando los protocolos de gestión de la abstinencia aceptados más actuales. Esto puede hacer que el proceso sea más seguro y fácil de realizar que si intentara hacerlo solo.

Condiciones Tratadas

- Uso de opioides
- Uso de alcohol
- Uso de benzodicepinas

Equipo de Tratamiento

Además de enfermeras registradas, médicos de medicina interna y psiquiatras, el equipo de tratamiento también estará formado por trabajadores sociales licenciados, consejeros licenciados, técnicos de atención al paciente (PCT) y consejeros certificados sobre alcohol y drogas (CADC).

Lo Que Nos Hace Diferentes

Mientras que la estabilización médica es un enfoque principal, el programa de manejo de la abstinencia también brinda otros servicios terapéuticos que alentarán a los pacientes a explorar de manera segura los desencadenantes, factores estresantes, señales de advertencia y habilidades de afrontamiento relacionados con su adicción. El camino hacia la recuperación se inicia cuando el paciente comienza a lograr los objetivos del tratamiento tanto a corto como a largo plazo. Introducción a la atención continua y la recuperación es promovida por una variedad de grupos. La programación basada en la unidad toma en consideración la fase de abstinencia de desintoxicación y respalda un plan de tratamiento individualizado. Aquellos pacientes que den positivo en opiáceos recibirán capacitación sobre naloxona y se les proporcionará un kit de naloxona en el momento del alta.

Next Steps

Sinai Chicago offers a full continuum of care right here at Holy Cross Hospital. Outpatient and Intensive Outpatient (IOP) as well as individual care for on-going medication monitoring is offered for continued recovery at **Behavioral Health & Under the Rainbow, Holy Cross.**

Collaborative relationships with community mental health centers, residential treatment centers, 12 step programs, Medication Assisted Treatment (MAT) clinic linkage and recovery homes are also an option for our patient's continued recovery. A Certified Alcohol and Drug Counselor (CADC) will provide support and facilitate aftercare planning, providing linkage between the patient and the critical resources needed to begin a successful recovery journey.

Center for Substance Recovery

The Center for Substance Recovery at Holy Cross Hospital is an advanced hospital-based drug and alcohol withdrawal management program that focuses on the needs of the individual. Respect for our patients is an important aspect of our withdrawal management program. The Center for Substance Recovery provides care monitoring and management in an inpatient setting. Medical professionals including registered nurses, internal family medicine doctors and psychiatrists will manage the uncomfortable symptoms of withdrawal around the clock, utilizing the most current accepted withdrawal management protocols. This can make the process safer and easier to get through than if you tried to do it on your own.

Conditions Treated

- Opioid Use
- Alcohol Use
- Benzodiazepine Use

Treatment Team

In addition to Registered Nurses, Internal Medicine doctors and Psychiatrists, the treatment team will also consist of licensed social workers, licensed counselors, patient care technicians (PCT) and Certified Alcohol and Drug Counselors (CADC).

What Makes Us Different

While medical stabilization is a primary focus, the withdrawal management program also provides other therapeutic services that will encourage patients to safely explore triggers, stressors, warning signs and coping skills related to their addiction. The road to recovery is initiated as the patient begins to accomplish both short-term and long-term treatment goals. An introduction to continuing care and recovery are promoted through a variety of groups. Unit based programming takes into consideration the withdrawal phase of detoxification and supports an individualized treatment plan. Those patients that test positive for opiates will have Naloxone training and will be provided with a Naloxone kit at the time of discharge.

Parenting for Racial Healing Parent Cafés

Join us April 23rd!

Parents make all the difference! Join us for meaningful, transformative conversations that create a safe space to explore how we can advance racial healing. Together, we'll share stories, ideas, and practical ways to support our kids in building a kinder, more inclusive world.

Join us for one or all of these 3 Café series, where we'll cover the following topics:

PROTECTING OUR CHILDREN FROM HATE 3/18

Let's talk about how we can protect kids from the harmful impact of racism and other forms of hate while teaching them to be strong and kind. This is all about helping parents create a safe, supportive space where kids can grow up valuing diversity and stand up against unfairness.

TOWARDS HEALING AND HOPE: DISMANTLING HARMFUL NARRATIVES 4/23

Join the conversation as we discuss how we can break down negative stereotypes and biases that cause harm. This conversation is about building new stories based on empathy, respect, and our shared humanity—helping to bring healing and hope to families and communities.

HEALING TOGETHER: LOVE, FORGIVENESS, AND COMPASSION

Dive into the powerful role of love, forgiveness, and compassion in the journey toward racial healing. This theme emphasizes building bridges across racial divides through understanding history and trauma, kindness, and a commitment to moving forward together with open hearts and open minds. This café will also address teaching children how to respond to race-based hurtful experiences.

Where: West40
415 Lexington St.
Maywood, IL. 60153
2nd Fl, Door 8, Buzz in for entry
